## SLIDER ROLL-OUT GLASS RACK

**Glass rack mounted on strong welded steel base with sealed, steel bearings for smooth telescoping action**

Constructed from strong 1/8-inch thick 6061 T6 aluminum posts and slats

2-inch wide padding along full length of horizontal slats

Aircraft-grade Huck® fasteners provide strong connections that won't crack like welds or loosen like screws or bolts

Rubber padding on all exposed surfaces of vertical posts

Strong vertical braces provide a stable platform at an optimal angle to support glass during transport

Storage space for tools and supplies on reverse side of glass rack

Spring locking handle - pull to roll rack forward and push to roll backward - Automatically locks in open and closed positions

Two rows of E-track and two cargo control straps standard - Pick-up truck models available with optional custom T6-Adjust-A-Poles

5- or 10-inch usable ledge with thick rubber blocks to protect the bottom edge of glass

**Easy, Struggle-Free Loading and Unloading!**

**Rack Smoothly Rolls In and Out of Vehicle on Telescoping Base**

**We're Here to Save Your Glass!**

# SLIDER ROLL-OUT GLASS RACK DETAILS

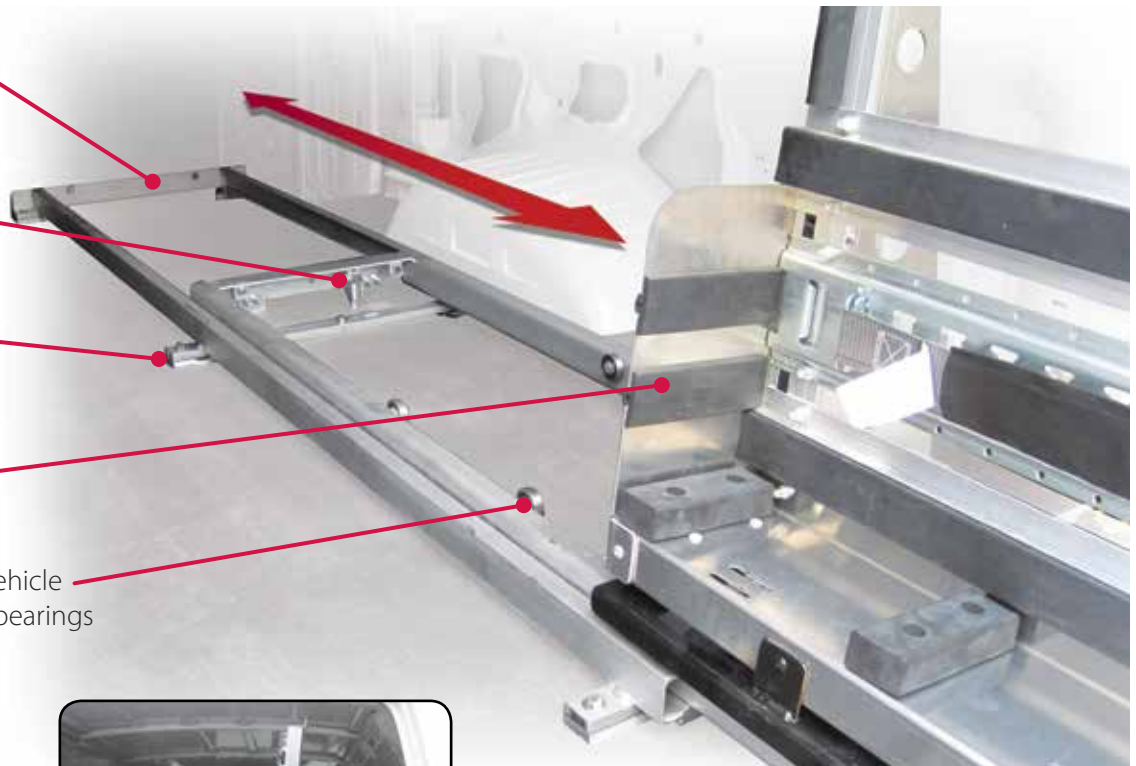

MGT-Glide telescoping base fabricated from strong welded steel channel

Latching system locks rack in open or closed position

Base securely attached to vehicle at multiple locations

Padded, removable front stop prevents glass from sliding forward

Rack smoothly rolls in and out of vehicle on maintenance-free, sealed steel bearings

Includes two rows of E-track and two cargo control straps

Cargo and glass are accessible when rack is inside vehicle

**No More Crawling or Climbing to Load and Unload!**

Storage space behind rack provides roll-out access to tools ▶
